

Wheelock Exceder LED Strobes, Horn Strobes & Horns

COOPER Notification

Cooper Notification

Leading supplier of Life Safety and Mass Notification Solutions

Industry's first LED notification appliances provide the industry's lowest current draw.

The Pinnacle of Life Safety & Energy Efficiency

For nearly a century, Cooper Notification's Wheelock name has stood for innovation, service and expertise. Cooper Notification, backed by global manufacturer Cooper Industries, is the industry's foremost developer in advanced technological solutions for Fire, Life Safety and Mass Notification. Wheelock is a trusted brand with proven experience providing industry first, patented technology for the largest range of audible and visual notification appliances. We continue to deliver on our commitment to provide customers with innovative product solutions, exceptional value and outstanding service.

Introducing Wheelock Exceder Series Patented LED Strobes, Horn Strobes and Horns.

The Wheelock® Exceder™ Series expands to include the industry's first LED notification appliances in one of the smallest, most compact single gang designs in the world. Cooper Notification's LED technology provides the industry's lowest current draw that allows for energy savings of 52%. Ideal for Green Buildings, it incorporates a breakthrough optical design, resulting in best-in-class efficiency that provides material and system cost savings. Minimizing current draw allows for a greater number of appliances on the NAC and fewer power supplies.

About the size of a cell phone, Wheelock Exceder™ LED horn strobes, strobes and horns feature one of the industry's smallest footprints with a sleek, modern low-profile design that will please building owners with reduced total cost of ownership. Installers will benefit from its comprehensive feature list, including lowest current draw, wide-range of candela settings, single-gang design, no tools needed for setting changes, and four convenient mounting options. These products are suitable for indoor wall-mount applications and are for 24V operation.

To meet synchronization standards for strobes, Exceder LED Strobes and Horn Strobes should be used in conjunction with the Wheelock DSM Sync Modules, Wheelock Power Supplies, SAFEPATH family of products or other manufacturers panels incorporating the Wheelock Patented Sync Protocol.

Protecting Life and Saving the Environment
One Strobe at a Time

Industry's lowest current draw

Save up to **52%** in current draw

One of the **smallest** foot-prints

Single-gang design

Energy Efficient & Environmentally Friendly

- Patented LED technology provides lowest current draw in the industry for 15 and 30 cd
- Fewer power supplies required, smaller wire gage, reduced wire runs
- Restriction of Hazardous Substances (RoHS)

Low Profile Design

- One of the smallest, most compact single-gang designs in the world
- Sleek, modern aesthetics
- No visible mounting screws
- Wall-mount models

Multiple Audible Settings

- 90 & 95 dB
- Select temporal or steady horn output

4 Field Selectable Candela Settings

- 15/30/75/110 cd

Easy to Install

- Convenient mounting to LED backboxes, any single-gang backbox and to 4" square and double gang with adapter kit
- Finger slide switches - No tools needed for setting changes
- In/out screw terminals for faster installations
- #12 and #18 AWG terminals

Strobe Synchronization Components

- Meets stringent synchronizing standards for strobes with Wheelock's DSM Sync Modules, PS-6/8 Power Supplies or SAFEPATH products

Approvals and Compliance

- UL Standards 1971 and 464
- ULC-S525 and ULC-S526
- ADA/NFPA/ANSI/OSHA compliant
- RoHS
